

Radiology Business Analytics

Success through Intelligence

In today's market you are faced with rising costs, declining reimbursements, increased regulation, and increased accountability. Achieving success is based on your ability to make informed and timely decisions that affect the quality and performance of your business. Your competitive advantage is realized in your ability to unlock the intelligence derived from the data found in your IT systems.

Medicalis Analytics is a unique intelligence solution that provides your key stakeholders access to critical performance indicators without the need for heavy IT time and investment. Medicalis Analytics is an "out of the box" solution that is designed specifically to meet the demands of a successful radiology practice.

Measure, Change, Succeed

Measure your business performance based on real data and not anecdotal evidence. Set benchmarks across your organization and exceed those targets by leveraging one or more of your Medicalis Radiology Solutions. Medicalis gives you the tools to monitor your business day to day and make actionable workflow changes to improve overall performance.

Make Better and Timely Decisions

Your key decision makers need information as soon as it's available. Medicalis provides real time access to the data allowing you to make real time decisions.

Increase Service Quality

Reducing report turnaround time and improving the quality of your reporting is a key market differentiator for you. Medicalis provides you with the analysis and the documentation to show your customers that you have a high quality practice.

Reduce or Eliminate IT Costs

Realize business intelligence without increasing your IT costs. No need to purchase additional hardware and hire more people. Medicalis Analytics is a full end to end solution that puts the data into your hands when you need it.

Volume Analysis

What is my volume today, next week, last year? Who is ordering the most studies or the least? Answers to these questions and more are easily provided with the Medicalis Volumes reporting package. Historical trending and forecasting tools allow you to see how your volumes change over time and simulate changes in volume in the future.

Productivity Analysis

How effective is my staff? Do I need to hire more people? Am I meeting my service levels and turnaround times? The Medicalis Productivity reporting package analyzes the performance of all your resources. Set benchmarks and give your department heads evidence and actionable direction on improving efficiency.

Quality Analysis

Are my patients and customers satisfied? How are my physicians scoring on peer review? Am I meeting compliance on critical results documentation? The Medicalis Quality reporting package not only lets you track the quality in your enterprise but provides evidence to payors, customers, and the market that your practice is high quality.

Real Time Access

All reporting packages are accessible through a secured web portal where you can control who can see what and when they can see it. Provide your executives with monthly reports on performance and quality. Give your department heads real time reports to see how patients are affected on a minute by minute basis.

- ✓ Point & Click Reporting
- ✓ Data on Demand
- ✓ Benchmarking & Forecasting
