

# Collaborative Workflow Solutions

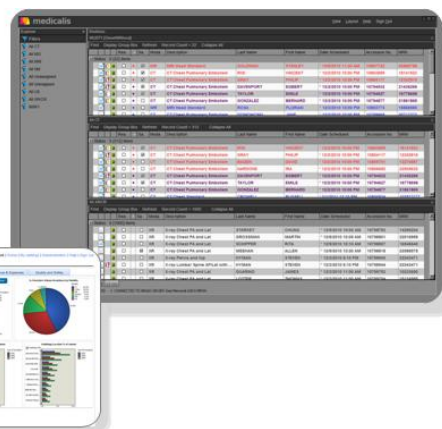

Founded in 1999, Medicalis has developed deep expertise in evidence-based imaging, radiology ordering, and the integration of healthcare information systems. The Medicalis Collaborative Workflow Solutions™ use this experience to enhance productivity and optimize utilization to ensure high quality, cost-effective healthcare.

- **Quality:** Patient-centric imaging solutions based on best practice evidence-based principles. Engineered for healthcare providers and payors to deliver high quality, high value healthcare.
- **Productivity:** Innovative workflow solutions that improve productivity, processes, and communication; create increased capacity and revenue; and enhance satisfaction levels for physicians and patients.
- **Utilization:** Appropriate utilization of high-tech imaging resources provide patients with safe and effective care, and eliminate duplicate or unnecessary procedures.

# Real Customers...

# Real Results...

## Utilization Solution

Collaborating with Health Plans and ACOs

- Clinical Decision Support
- Elimination of RBMs
- Community-based utilization management

### Minnesota Market

Medicalis has deployed a web-based network that applies evidence-based clinical guidelines to physician's orders, and facilitates real time access to their local radiologists. The structured web-based process and clinical decision support of the Medicalis network produces clear, appropriate orders, which reduces unnecessary testing and ensure greater patient safety. Three major payors in the state are now participating in the network.

## Operational Solution

Maximizing Asset Management

- 20% increase in asset utilization
- Increase in market share
- Optimized department workflow

### BRIGHAM AND WOMEN'S HOSPITAL

Brigham and Women's Hospital (BWH) is a 793-bed non-profit teaching affiliate of Harvard Medical School and a founding member of Partners HealthCare. Medicalis' origin comes from a joint venture with Brigham and Women's Hospital to design and implement workflow solutions for the delivery of clinical decision support and scheduling tools for ordering physicians. The Brigham and Woman's Hospital Department of Radiology performs more than 550,000 inpatient and outpatient radiology procedures annually in the hospital's radiology facility and more than 350,000 in its community radiology locations.

## Professional Solution

Optimizing Radiologist's Productivity

- 14% improvement in productivity
- Measurable quality benchmarks
- Differentiated service and quality delivery

### Inland Imaging

Inland Imaging is a customer and development partner of the Medicalis Professional Solution for Radiologists. Inland Imaging interprets over 1,000,000 imaging exams annually in 21 radiology sites, serving over 40 organizations ranging from large tertiary medical centers to rural hospitals and multi specialty and single specialty clinics.
